Education

- BSc (Conservation Biology and Ecology) University of Exeter
 - Diploma (Veterinary Bioscience) Ngee Ann Polytechnic
 - GCSE O'level Paya Lebar Methodist Girls' School (Secondary)
-

Professional Experience

JUN – JUL 2023

Research Intern, University of Exeter

- Extraction, quantification and matching of Chestnut-crowned babbler begging signals
- Gained proficiency in acoustic software and familiarity with bioacoustics
- Management of large volumes of data and data cleaning
- Data analysis and presentation using R

NOV 2021 – JUL 2023

Student Crew, Falmouth Exeter Students' Union

- Conducted and led student satisfaction surveys, feedback and focus group sessions
- Supported manpower and logistics for university-based events
- Compiled UK university data resulting in the development of effective Cost-of-Living crisis initiatives – resulted in increased support strategies such as decreased campus food prices and a communal larder

JUL – SEPT 2022

Research Intern, Singapore Zoo

- Pilot investigation into enhancing food presentation in free-flight aviaries and back-of-house facilities
- Literature review, protocol development, data collection and analysis using R
- Analysed, designed and utilised behavioural ethograms, camera traps and ZooMonitor
- Co-authored conference material for the 30th Southeast Asian Zoos Association (SEAZA) Conference
- Animal husbandry (Small mammals, primates, and birds)
- Performed technical animal management work and animal husbandry in accordance to established protocols and procedures
- Visitor communication and spreading the conservation message

MAR – JUN 2019

Veterinary Intern, National Chiayi University Veterinary Teaching Hospital (Taiwan)

- Aided veterinarians in consultation, surgery, and care to warded animals

Sep 2023

- Developed skills in animal husbandry, diagnostic imagery, histopathology and laboratory techniques
- Successfully troubleshooted and navigated client complaints
- Performed various translations and interpretations from Mandarin to English
- Skills in post-mortem examination of diseased domesticated animals, livestock and wildlife

SEPT 2018 – FEB 2019

Veterinary Nurse, Stars Vet

- Aided veterinarians in consultation, surgery, and care to warded animals
- Developed skills in effective animal restraint, blood taking and triage
- Performed stock taking and clinical record keeping

Research Area/Topic/Discipline

- Experience in animal behavioural related research and bioacoustics

Short Biography

I am a recent graduate from the University of Exeter in Conservation Biology and Ecology. I have a strong interest in urban ecology, human-animal interactions and promoting successful human-animal coexistence. These interactions, especially in the context of Asia, are a particular interest of mine due to the diversity of cultures and the different ways in which they shape people's relationship with animals.

Awards/Grants and Distinctions

Dean's Commendation for Academic Excellence 2023
